

## **Intermediate C/C++ Software Programmer/Analyst**

Interactive Visualization Systems is a Fredericton-based software development company, producing world-leading 3D visualization software for the interactive exploration and analysis of geo-spatial data.

Applicants should have experience and/or skills in the following areas:

- Bachelor's (minimum) or Master's in Computer Science.
- 3 or more years of C or C++ programming experience.
- Able to work comfortably in either a Windows or UNIX/Linux development environment, preferably both.
- Strong analytical, communication, and team skills.

Experience with the following is also desirable:

- GIS or mapping systems.
- OpenGL development.

The salary offered is commensurate with experience and includes additional benefits.

If your qualifications and experience match the above requirements and you have a keen interest in software development, please forward your resume to the following”

Interactive Visualization Systems, Inc.  
420 York Street, 3<sup>rd</sup> Floor  
Fredericton, NB E3B 3P7
